

Hello! Last year was the 30th anniversary of Pi Day, which makes this year the 31st. That's got the first two digits of pi, rather than just the first one, and so is even more of a milestone and clearly not just me making up reasons to call every Pi Day special. (I'm not the only one...) I may have gone a little insane making the puzzles this year, I'm sure my mental state wasn't too affected though. I can't wait for you all to see what I've been working on during the past year.

There are 14 non-meta puzzles, all of which start off unlocked and are linked below. I'll send the first meta once you get at least 4 answers that go to it, and it will answer the question "What should Jack do if he's gone crazy from work?" and the second meta once that's solved and you get at least 4 answers for it, which will answer the question "Now that Jack's followed your advice, rather than dull, how is he feeling?"

So, without further ado: All, work and no play makes Jack. A dull boy:
